The Drawings filed 8-30-2004 have been accepted.

The following is an examiner's statement of reasons for allowance: Applicants' narrowing of the claims 1-42 to include the limitation that the gas stream containing an olefin is an offgas stream resulting from an epoxidation process avoids the anticipation rejection. Details of the process, such as adding at least 1 inert gas in the distillation step and such as not adding an inert gas in the absorption step, are details not taught by the secondary reference, Jubin et al. Thus the obviousness rejection has also been overcome.

"A pressure of from more than 10 to 20 bar" (see claim 38, line 2 e.g.) is meant to distinguish from "a pressure of 10 to 20 bar". That is a pressure of 10 bar is not included in the former, whereas it is in the latter. The upper limit of both ranges is of course 20 bar. See the specification at p. 7, line 24 for support.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
